EL NIÑO ACTION BRIEFING · 4 NOVEMBER 2026

Downtown Sheffield, UK

This El Niño tilts the odds toward a wet, stormy early winter here, but it doesn't change who is at risk: people who are homeless, tenants in blocks where heating fails, and anyone on foot near a flooded river. The first move is emergency naloxone in every hostel and day centre.

REGION	EXCESS HEAT DEATHS	WINDOW	DOMINANT HAZARD
England (GADM GBR.1_1), region level. Nothing finer exists for City ward	800 already past (June–September 2026); 17 forecast October 2026 – March 2027	6-month forecast, Oct 2026 – Mar 2027; summer 2027 is not covered	River and surface-water flooding; failed electric heating in flats; winter on the street; heat next summer

17/17 recommendations verified. 17 corrected, 0 unverified, 0 contraindicated among the ranked actions; none was confirmed without a correction. 9/9 For you steps were checked and all were corrected. Exposure figure: Climate Impact Lab El Niño Heat Mortality Tracker data (26 October 2026, pre-peer-review), England, not this ward; heat only, so its zero winter months do not mean zero cold deaths. **The funding target fell by more than a third in verification, from £83,000 to £50,000 (US$111,000 to US$67,100),** because one placement was cut and another reduced. El Niño's link to Sheffield is weak: this is an ordinary-winter plan with worse odds of wet and storms.

EXECUTIVE SUMMARY — AT A GLANCE

53.38°N 1.47°W, United Kingdom · Natural Earth

- **The risk.** Flooding kills people on foot here, as in 2007; the Sheaf and Porter schemes are unbuilt, and Kelham's defence starts in 2028 at the earliest.
- **For you.** As a resident, sign up for free flood warnings today (0345 988 1188) and stay back from flooded river edges.
- **The money.** £30,000 / £50,000 / £88,000 (US$40,200 / US$67,100 / US$118,100), floor, target, and ceiling; vaccination in homeless services comes first.
- **Do not.** Do not go near a flooded river edge or step into moving water, on foot or from a car.

FOR YOU, AS A RESIDENT 9 STEPS

Downtown Sheffield is young, rented, and electric: 62.2% students, 1.4% aged 65 or over, and most homes heated by electricity alone. Your likeliest winter problems are a flood at street level, heating that fails, and a power cut that leaves you with no heat at all. The ranked actions below are written for the city and its partners. These are the ones you can take yourself.

Sign up for flood warnings today, and learn what they miss

PARTIALLY CONFIRMED FROM ACTIONS 5 AND 6

BY WHEN	COST TO YOU	PROTECTS
Today	None	You, your car, and your belongings

Sign up online or call Floodline on 0345 988 1188. This covers rivers, not surface water, so also watch Met Office rain warnings and move anything you keep in a basement car park. Never go near a flooded river edge or step into moving water, on foot or from a car; call 999 if someone is in the water.*

If your block's heating fails, write to the landlord today, keep a dated log, and then call the council

PARTIALLY CONFIRMED FROM ACTION 7

BY WHEN	COST TO YOU	PROTECTS
The day it fails	None	You and your neighbours in the block

Write it down, date it, and note the room temperature each day. Your landlord must keep heating and hot water working. If nothing happens within 7–10 working days, Private Housing Standards (0114 273 4680) can step in, including for student flats. Do it with your neighbours: one report can help a whole building. Students can also ask their SU advice centre.

Heat safely: no barbecues, camping stoves, or ovens, and test your alarms today

PARTIALLY CONFIRMED ROLE-SPECIFIC

* Suggested formulation: check with a health worker before sharing.

BY WHEN	COST TO YOU	PROTECTS
Today	None. Your landlord must fit smoke alarms	Everyone in your flat and on your floor

Barbecues and camping stoves indoors can kill through carbon monoxide. Do not dry clothes on heaters. Do not charge batteries on an escape route or while asleep, and never wedge a fire door. Landlords must fit a smoke alarm on each storey. The Fire Service has an online home safety check for anyone.*

Get ready for a power cut: 105, a torch, and a charged power bank

PARTIALLY CONFIRMED · FROM ACTION 13

BY WHEN	COST TO YOU	PROTECTS
30 November 2026	Power bank about £15–£20 (US$20–US$27); calling 105 is free	You, and anyone relying on electrical equipment

Most homes here heat by electricity, so a power cut means no heat at all. Call 105 free, use a torch and not candles, layer up, and close internal doors. A power bank is on the government's checklist. If you are medically reliant on power, of pensionable age, or have a child aged five or under, ask to join Northern Powergrid's Priority Services Register, which is free. Compensation is automatic: £100 (US$134) outside severe weather, or £90 (US$121) after 24–48 hours in a storm.*

Buy contents insurance by 30 November, and check that it covers flooding

PARTIALLY CONFIRMED · ROLE-SPECIFIC

BY WHEN	COST TO YOU	PROTECTS
30 November 2026	About £92–£122 (US$123–US$164) a year	Your belongings

67% of renters had no contents policy in 2024. Your landlord's cover does not cover your belongings. Prices vary: Tesco's renter customers paid £92.28 on average, and its average renter flood payout was £4,986 (US$6,690). The Association of British Insurers put contents-only cover at £122 in late 2025. Flood is usually included, but read the policy.

If money runs out, ask for a Crisis Payment, and check Warm Home Discount

* Suggested formulation: check with a health worker before sharing.

PARTIALLY CONFIRMED FROM ACTION 11

BY WHEN	COST TO YOU	PROTECTS
As soon as you need it	None	Your heating and food budget

Sheffield's Crisis Payment does not have to be repaid. You can apply yourself, online or on 0114 273 4567, or through a Trusted Assessor such as Citizens Advice. There is a limit of one application every six months. Warm Home Discount is £150 (US$201) if you are the named billpayer and on a means-tested benefit. The council lists a Green Doctor visit from Groundwork for fuel poverty and energy debt; eligibility applies, so ask first.

Know where to eat without a voucher

PARTIALLY CONFIRMED FROM ACTION 15

BY WHEN	COST TO YOU	PROTECTS
Now	None	You and your household

Open Kitchen Broomhall (Mondays), The Sanctuary (Tuesdays), FoodCycle Broomhall (Wednesdays) ask for no referral at the time of writing. The Sunday Centre (Sundays) is listed for people who are homeless. Phone first, since listings differ. S2 Food Bank serves S1, S2, and S12. Families on Universal Credit can claim free school meals, but funded holiday places go only to children on the older, income-based route. Booking for Christmas opens on 27 November.

Check the vaccines you qualify for, register with a GP, and know when to call 999

PARTIALLY CONFIRMED FROM ACTIONS 2, 3, 8, AND 9

BY WHEN	COST TO YOU	PROTECTS
Flu by 30 November; MenB now	Free if eligible. Private flu jab about £17–£22 (US$23–US$30)	You, and people sleeping rough nearby

Check the flu list: students qualify only if they are in a listed group. If you started university this autumn, take MenB now at a pharmacy, with no GP needed. Registering with a GP is free and needs no ID or proof of address. Suspected hypothermia means 999 or A&E, and

* Suggested formulation: check with a health worker before sharing.

111 is for urgent but uncertain problems. If you see someone sleeping out in the cold, stay with them and call 0800 7311 689 together, as the line needs their details.*

Plan for next summer now: heat can arrive in May

PARTIALLY CONFIRMED FROM ACTION 10

BY WHEN	COST TO YOU	PROTECTS
Before May 2027	None for the alert	You, in a hot flat

Sign up for Weather-Health Alerts. If you can't open windows at night because of noise or security, find somewhere cooler in advance, as NHS advice assumes you can. Shade windows in the day, drink plenty, and check on anyone frail. Keep your fire door shut.*

What to ask of the people in charge

- Ask Council Housing what temperature or forecast opens the emergency beds, and whether storm nights count (action 3).
- Ask your managing agent whether your block is registered for flood warnings, and what the plan is for the basement car park (action 6).
- Ask your managing agent whether your lifts and water pumps would stop if Neepsend substation failed, and ask the Resilience Forum what the reply was (action 13).
- Ask your councillor what the council will do on hot days next summer, and whether it will act on any alert rather than a June date (action 10).

WHAT THIS PLACE SHOULD DO RANKED

Ranked by expected lives saved per unit of effort before the peak. Backing lenses are shown per action; an action several lenses reached

* Suggested formulation: check with a health worker before sharing.

independently is the stronger bet. The ranking is a judgement: nobody has published deaths for this ward.

1. Put emergency naloxone and overdose training in every hostel, day centre, and outreach bag by 30 November

PARTIALLY CONFIRMED | PUBLIC HEALTH + PHILANTHROPIST | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC public health commissioners, with Likewise	30 November 2026	No placement. Services get emergency stock free through their drug service	Overdose deaths among people who are homeless

Drug deaths, not cold, are the clearest measured risk among the people most exposed here. Sheffield's drug-misuse death rate is 7.84 per 100,000 (6.49–9.38; 120 deaths, 2022–24) against 5.80 for England, a city-wide figure. Three city-centre homeless deaths in ten days in November 2024 raised suspicion of nitazenes, but inquests are pending and that is not confirmed. Services can hold naloxone for emergency use, free, through their drug service. They cannot yet give clients take-home kits: the law proposed in December 2025 had no published outcome as of 3 November. Take-home kits come from listed pharmacies, and Likewise is the city's drug service.*

Evidence is indirect. Walley 2013 found overdose death rate ratios of 0.73 and 0.54 in 19 Massachusetts communities (observational); Bird 2016 found the post-release share of opioid deaths fell from 9.8% to 6.3% in Scotland (before and after). Neither tested hostel stock. Hostel coverage in Sheffield is not published, so the first job is a call to Likewise to find which services already hold it. Commercial B&Bs may fall outside the draft law; check them separately.

2. Renew flu and pneumococcal sessions at the Sunday Centre and add the Archer Project, by 30 November

PARTIALLY CONFIRMED | PUBLIC HEALTH + FRONTLINE + PHILANTHROPIST | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
South Yorkshire ICB, with a pharmacy or nurse partner	30 November 2026	£12,000 (US$16,100), our estimate, if the ICB does not fund delivery	Flu and pneumonia illness among people with low uptake

* Suggested formulation: check with a health worker before sharing.

Since 1 October, people aged 16 and over who are rough sleeping or in hostels or night shelters can have a free flu jab, and pneumococcal vaccine is free too and can be given at the same visit. Broader homelessness, including most temporary accommodation, is not covered unless the person qualifies another way. The national toolkit says no ID, address, or proof of homelessness is needed, but that outreach is not funded in all settings. Wicker Pharmacy ran sessions at the Sunday Centre in November 2023, with 20+ jabs in week one and no extra funding; we found no record of them for 2026.*

This fixes access. It is not proven to save lives here. Story 2014 found 23.7% uptake among at-risk homeless people in London against 53.2% nationally (self-report against GP codes, no outcomes). The £7,475 (US$10,000) per QALY figure models the older England and Wales programme for elderly and at-risk people, not this group.

3. Publish what opens the emergency beds, send outreach on flood warnings, and print a card that says stay with the person while you call

PARTIALLY CONFIRMED | FRONTLINE + EMERGENCY MANAGER + PUBLIC HEALTH | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Housing, with Archer and outreach partners	30 November 2026	Staff time; printing not costed. Optional £20,000 (US$26,800) winter worker, only if confirmed unfunded	People missing emergency shelter in cold and storms

The council's page offers emergency shelter on 0800 7311 689 and needs the person present to give their details, so a passer-by's call alone may not be enough. It gives no temperature: help opens "if temperatures fall or severe weather is expected". A 2021 council record says a threshold scheme gave way to a Winter Plan. The −2°C figure in a 2024 student news report could not be confirmed, so the council should state its rule. We found no Sheffield protocol that sends outreach to riverside sleeping sites on a flood warning; that is a new request.

* Suggested formulation: check with a health worker before sharing.

Homeless Link guidance leaves storm activation to local decision. Sheffield accepted £1,441,797 (US$1.93 million) for rough sleeping; 38 people were counted sleeping rough in the 2025 snapshot and 64 are long-term rough sleepers (August 2026). Whether that money pays for this work is unverified, and Archer's free reserves of £414,808 (US$557,000) mean cash may not be the constraint. Ask first.

4. Fund ASSIST Sheffield for 10 more winter places for refused asylum seekers, December to March, once it confirms it can open them

PARTIALLY CONFIRMED | PHILANTHROPIST + FOOD SUPPLY + FRONTLINE | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
ASSIST Sheffield, with a private funder	Decision by 30 November; places December–March	£18,000 (US$24,100) for 10 places; £36,000 (US$48,300) for 20 on written confirmation of rooms	People with no income and no public route sleeping out in winter

This is the clearest place where private money reaches people public money does not. Refused applicants get no cash, at most £49.18 (US$66) a week on a card if eligible, and the Crisis and Resilience Fund by default excludes people with no recourse to public funds (paras 28–31). ASSIST's 2024–25 accounts show 46 beds, 112 people supported, and winter demand above capacity.

The arithmetic is an upper estimate: 10 places × 4 months × about £450 (US$600), where £450 is the charity's whole spend divided by people supported, not the cost of one more bed. Beds, not cash, are the stated limit: 15 of its 19 properties were donated or lent. No mortality evidence exists for this placement; its case is that nothing else reaches these people. Ask ASSIST how many places it can actually open before granting.

5. Add low bridges, underpasses, and riverside paths to the Streets Ahead hotspot list with closure triggers, and say: stay back from flooded river edges

PARTIALLY CONFIRMED | EMERGENCY MANAGER + HISTORIAN + SKEPTIC | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Flood & Water, with Amey and South Yorkshire Police	30 November 2026	Staff time under the existing emergency plan	Deaths on foot, the pattern of 2007

* Suggested formulation: check with a health worker before sharing.

Sheffield's two 2007 flood deaths were people on foot. A 14-year-old was swept away at Millhouses Park where, the coroner found, "the edge of the water was concealed by the flooding". A 68-year-old man was lost in the Newhall Road and Wicker area; The Star says he was crossing the road and the BBC that he had got out of his car. Both sites appear to be outside City ward, but the same rivers run through it. "Do not cross" is not enough, because the boy was not crossing.

Amey still holds the highways contract, to 2037, and its emergency plan already lists hotspots checked before events. This extends that list to people on foot. No study measures the effect of closures; the case rests on how these deaths happened. Clearing culverts and closing the Don gates are not listed here because the 2019 and 2023 reports show they already happen.

6. Managing agents of Kelham, Neepsend, and Victoria Quay blocks register for flood warnings by 30 November, with a plan for basement car parks

PARTIALLY CONFIRMED | EMERGENCY MANAGER + SKEPTIC | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
Block managing agents, with SCC Flood & Water	30 November 2026	Free	People and cars caught in basements; an empty contact list after September tenant turnover

The Environment Agency's Get Flood Warnings service is free and open to organisations. Kelham Island (123FWF621), Neepsend (123FWF619), Victoria Quay (123FWF596 and 597), and the Sheaf and Porter (123FWF591, 593–595) appear to have warning areas, from a nearby-location query that should be checked for each block. The council cannot bulk-add people, so agents must register themselves or consent to being added.

* Suggested formulation: check with a health worker before sharing.

The limit: surface water gets no warning. Central Quay's car park flooded in November 2019 as "torrential rain poured in", so a river warning might not have covered it. Kelham's defence is expected from 2028 at the earliest, and full approval still depends on remaining funding, so this is what protects those blocks for now.

7. One resident per block keeps dated heating logs, writes to the landlord, and then goes to the council's Private Housing Standards team together

PARTIALLY CONFIRMED | FRONTLINE + SKEPTIC + ECONOMIST | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Private Housing Standards, with resident volunteers and SU advice centres	Start now; before December cold	Printing and volunteer time	Weeks in unheated flats; dangerous improvised heating

62.0% of households here heat by electricity alone (England 8.7%) and 71.8% rent privately. The Sheffield Tribune reported nearly eight weeks without heating or hot water at Lightbox, Earl Street, last winter, with a hospital nurse among tenants paying £780 (US$1,050) a month. One resident was reportedly told to use an open oven, and the council says complainants were offered heaters. So one person in the building filing a complaint can help a whole block.

The route: the council usually needs prior written notice to the landlord, with 7–10 working days typically enough, and then acts on 0114 273 4680. Excess cold is one of the 21 housing hazards, and section 11 makes landlords keep heating and hot water working. No study tests this tactic. It follows a local case, and we found no live selective licensing to lean on. Hallam's SU advice centre is confirmed; the University of Sheffield SU's housing advice page could not be opened.

8. GP practices call and recall the ward's few eligible older people for RSV vaccine by name

PARTIALLY CONFIRMED | PUBLIC HEALTH + FRONTLINE | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
GP practices, with South Yorkshire ICB	31 December 2026	Within existing GP practice	RSV hospital admissions among the few older residents

* Suggested formulation: check with a health worker before sharing.

There are too few older people here for mass messages: the 2021 census counted 298 people aged 65+, 95 of them aged 75+. A named list is realistic. Bucholc 2026 found 75% (69–80) effectiveness against hospital admission at ages 74–79 across the UK (peer-reviewed, test-negative). Eligibility is ages 75+, ages 65–74 with chronic respiratory disease or immunosuppression, and care-home residents; it is one dose, offered all year, and not routinely given with flu.*

The study measured hospital admission, not death, and stops at age 79. It transfers well to ages 75–79 and has not been tested at 65–74. No ward-level RSV uptake figure was found, so practices must check their own lists. Whether Age UK Sheffield can help with reminders and transport is unconfirmed.

9. Both universities and the ICB push eligible first-year students to walk-in pharmacies for MenB now, not on the 31 December deadline

PARTIALLY CONFIRMED | PUBLIC HEALTH | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
South Yorkshire ICB, with both universities	Now; first doses by 31 December, second by 31 March	Vaccine is free; messaging within existing budgets	Meningitis in new students

The one-off programme covers people born on or after 21 July 2001 who started university or certain residential further education for the first time in autumn 2026, plus Year 13 leavers born 1 September 2007–31 August 2008. Postgraduates and returning students are excluded. Pharmacies can give it without GP registration. 93 of 96 confirmed cases in 15–24s in England were MenB in 2025–26, including the 21-case Kent outbreak. Cases peak in October–November, so a dose taken in late December misses this year's peak.*

* Suggested formulation: check with a health worker before sharing.

Cases are few and the benefit in this age group is uncertain. The 75% figure is an infant population reduction; JCVI has no adolescent effectiveness estimate and no effect on carriage. We ranked it here because the deadline is hard and it costs almost nothing. First-year numbers for the ward were not found.

10. Public Health writes a heat plan for electric, single-aspect flats by 31 March, with cool spaces opened by any heat-health alert, not by a June date

PARTIALLY CONFIRMED | HISTORIAN + PUBLIC HEALTH + SKEPTIC | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Public Health	31 March 2027	Staff time; venue costs not known	Next summer's deaths, which this winter's plan will not touch

Heat kills more people than floods here, and it is the hazard with no scheme we could find. Yorkshire and the Humber had 391 excess deaths (156–625) in summer 2022. England's estimated 753 deaths in the heat of 24–27 May 2026 came before a 1 June start date, so a Leeds-style 1 June–30 September scheme should be triggered by alerts, which can also be issued outside the core season. Sheffield reached a June record of 34.2°C on 26 June 2026.

* Suggested formulation: check with a health worker before sharing.

Evidence is thin. Leeds's pilot has published no outcome data. Studies of hot flats found over 40% of people in a Leeds retrofit block never tried to use the ventilation as intended, and in a London survey 48 of 89 cited security and 33 of 89 noise as reasons not to open windows at night. So "open your windows at night" will not reach everyone here. The tracker does not cover summer 2027, and no one can yet say what that summer brings.

11. The council amends its Crisis Payment rules so money can move on a flood warning, and sets aside a cold-relief tranche

PARTIALLY CONFIRMED | ECONOMIST | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Cost of Living team	Rule change by 15 December 2026	About £375,000 (US$503,000), our sizing, from the existing £9,970,109 (US$13.4 million) fund	Households waiting for ministers after a flood

Sheffield has £9,970,109 for 2026–27, and the guidance allows proactive payments and counts serious flooding as a crisis (paras 17, 86). But Sheffield's published rules are application-only, one per six months, exclude white goods, and do not mention floods. Our sizing: flood, up to £125,000 (US$168,000), 250 homes × £500 (US$671), on an Environment Agency warning for the Don at Kelham Island; cold, £250,000 (US$335,000), 2,500 households × £100 (US$134), on a Cold Weather Payment trigger or amber cold alert. The first is the case that matters: Bellwin is discretionary and flood recovery payments need ministers.

* Suggested formulation: check with a health worker before sharing.

The panel disagrees here. NICE's modelling found fuel subsidies poor value on health alone, so call the cold tranche crisis relief, not a life-saving measure, and target it. The sizing is ours and not a published cost; the fund's strand budgets could not be read. The population is citywide, since very few cold-vulnerable households are in this ward. The DWP checker showed S1 had no Cold Weather Payments so far this winter.

12. Council Housing overlays its temporary-accommodation placements on the flood warning areas by 30 November

PARTIALLY CONFIRMED | EMERGENCY MANAGER | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Housing	30 November 2026	Staff time	An evacuation that misses people the council itself placed

The council had 739 households in temporary accommodation in March 2025, 281 of them in B&Bs spot-purchased from around 20 providers. Nobody outside the council can tell where they are, and one fixed scheme near Kelham returned the Kelham Island warning area in a 250 m query. In 2019, businesses and hotels in the lower Don Valley were evacuated.

The premise is unproved: no source links these households to those hotels, and the count is 19 months old. The Resilience Forum's vulnerable-persons data project was due to finish in late 2025, and we could not find what it produced. This should be held by the council, not published.

13. By 20 November, the Resilience Forum asks National Grid and Northern Powergrid what now protects Neepsend substation, and which tall blocks would lose lifts and pumps

PARTIALLY CONFIRMED | EMERGENCY MANAGER | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
South Yorkshire Resilience Forum	20 November 2026	A letter	A repeat of 2007, unplanned

* Suggested formulation: check with a health worker before sharing.

In June 2007, Neepsend was inundated and about 36,000–40,000 customers lost power (National Grid reported 1.2–1.5 m of water). The Pitt Review says 750,000 nearly lost supply across several Sheffield substations. A contractor's undated case study describes a flood wall, gates, and pumps at Neepsend, but we could not confirm when they were finished or what they protect against.

It may already be solved, and the point of the letter is to find out. Northern Powergrid's site would not open to our research agents. Lift and water-pump dependence in tall blocks is our inference; 72.9% of homes here are purpose-built flats. The council then overlays affected postcodes on its tall-building data.

14. Volunteers phone every S1 and S3 Welcome Place and print a translated list of who is really open after 2pm and at weekends

PARTIALLY CONFIRMED | FRONTLINE + SKEPTIC | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
Voluntary groups, with the council's map team	30 November 2026	Volunteer time; printing not costed	Afternoons and weekends with nowhere warm

Day services stop early. The Archer Project is open weekdays 8:30–1, and to 10am on Wednesdays, and the Sunday Centre runs for 90 minutes. The council has a Welcome Places map of over 400 places citywide, last modified in May. Send corrections to the map team, and hand out the list at the Tuesday meal at The Sanctuary, which averages 115 people. City of Sanctuary's drop-in has 20+ interpreters covering 18 languages.

* Suggested formulation: check with a health worker before sharing.

This is an access aid, and it makes no health claim: the government's evidence review found no studies that directly assessed health outcomes, and in Gateshead people came by chance or word of mouth. We could not read the map's venue data, so the S1 and S3 count is unknown.

15. Print a no-voucher food card by 30 November, with hot meals first for people without kitchens

PARTIALLY CONFIRMED | FOOD SUPPLY + FRONTLINE | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Cost of Living team, with ASSIST, The Sanctuary, and the SUs	30 November 2026	About £500 (US$670), our estimate	People with no caseworker missing food

The real break here is the last mile, not the shelves. S2 Food Bank is free and self-referral, Wednesdays 12–2, but serves S1, S2, and S12 only. S3's Burngreave food bank needs an agency referral. The card should list Open Kitchen Broomhall (Mon 10–2), The Sanctuary (Tue 10–2), FoodCycle Broomhall (Wed 12:30–2:15), and the Sunday Centre (Sun 1:30–3). Phone before printing, since listings differ. Catered asylum housing pays £9.95 (US$13) a week, and 184 people in Sheffield were in contingency housing in June 2026, so a kitchen is not a given.

We found no comparative evidence for no-referral help. Leeds's cash-first pilot (283 people; 94% preferred cash) was published by its own partners, and half of matched recipients later needed a food bank. Local demand data is poor: Trussell parcels in Sheffield fell to 56,272 in 2025, but independents such as S2 are excluded and rule changes move the count.

16. By March, plan Crisis Fund cash for June–September 2027, released if ONS food inflation reaches 4%

PARTIALLY CONFIRMED | FOOD SUPPLY | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
SCC Cost of Living team	31 March 2027	Reprofiled within the £9,965,086 (US$13.4 million) 2027–28 allocation	Cutting food at the price peak

* Suggested formulation: check with a health worker before sharing.

The risk is price, not shortage, and it is late. ONS food inflation was 1.3% in September, with the next release on 18 November. The Food and Drink Federation forecasts 3.9% by December and 6.4% in July 2027, driven by energy and contracts as well as El Niño. Sheffield has an allocation for 2027–28. Keep crisis payments open all year while doing this.

The signal is mixed. A government roundtable summary recorded "virtually no discernible impact" on UK prices from the 2023 El Niño. The peak rests on one trade-body forecast. Two proposed triggers failed: the FAO sugar index has already risen 26.7% since June (our calculation), and Defra's wholesale series covers home-grown produce only, so it misses imports.

17. Kelham and Neepsend businesses get parametric flood quotes through a broker by 30 November, to bridge the years to 2028

PARTIALLY CONFIRMED | ECONOMIST | ADAPTATION INVENTORY: NOT CONSULTED

OWNER	BY WHEN	COST	PREVENTS
Riverside businesses	30 November 2026	Premium unquoted; sensor £100 (US$134) + VAT a year	Uninsured losses until the scheme is built

Businesses and buildings of more than three units fall outside Flood Re. FloodFlash is trading through UK brokers: it pays on depth measured at the property, with cover up to £5 million (US$6.7 million). Its fastest Storm Bert claim paid in about 10 hours. The trigger depth and cover are chosen by the client, so basis risk is small but premiums are unknown until quoted.

This protects businesses and jobs, not lives, so it ranks last. Kelham and Neepsend are outside the Sheffield BID boundary, so a BID subsidy can only reach in-boundary riverside members such as Nursery Street and part of the Wicker. No public source gives a typical premium.

* Suggested formulation: check with a health worker before sharing.

WHO DOES WHAT

RACI CHART

R = Responsible (does the work) · **A** = Accountable (one per action; signs off and answers for it) · **C** = Consulted (asked before) · **I** = Informed (told after). SCC is Sheffield City Council. Built from the owners named in the verified actions. No one here has been contacted or has agreed to a role; every row is a proposal.

Action	SCC Housing	SCC Public Health	SCC Flood & Water	SCC Cost of Living	ICB & GPs	Likewise	Voluntary groups	Universities & SUs	Managing agents & landlords	Amey & Police	SY Resilience Forum	National Grid & Northern Powergrid	Riverside businesses
1. Naloxone in hostels and day centres	C	A				R	R						
2. Flu and pneumococcal in homeless services	I	C			A/R		R						
3. Cold-night and storm-night outreach	A/R		C				R						
4. ASSIST winter places	I						A/R						
5. River-edge closures and message			A							R	C		
6. Flood warnings for riverside blocks			C						A/R				
7. Block heating failures	A						R	C	R				
8. RSV recall for older residents					A/R		C						
9. MenB for first-year students		C			A			R					
10. Summer 2027 heat plan		A/R		C			C				I		
11. Crisis Fund trigger tranches		C	C	A/R									
12. Temporary accommodation flood map	A/R		C								I		
13. Neepsend substation letter			I						I		A/R	R	
14. Warm-space phone check				A			R						
15. No-voucher food card				A			R	C					
16. Food cash for summer 2027		C		A/R									
17. FloodFlash quotes for businesses			I										A/R

What the chart shows: the council holds most of the accountability, split across four teams, so a single named winter lead would help. Actions 5, 6, 7, 11, and 13 need a decision or a letter, not new money. Actions 2, 3, and 4 are where outside money matters.

WHERE MONEY DOES THE MOST

FUNDING

The Philanthropist lens, reconciled against the ranked actions and verified. Placements are ranked by marginal lives saved per pound, as a judgement: no cost per death averted exists for any of them. The envelope is bounded by what this place can spend before the peak, not by what it needs.

* Suggested formulation: check with a health worker before sharing.

FLOOR	TARGET	CEILING	LARGEST UNCERTAINTY
£30,000 (US$40,200): vaccination access and 10 ASSIST places	**£50,000 (US$67,100): adds the Archer worker, if unfunded**	**£88,000 (US$118,100): adds 10 ASSIST places and a £20,000 trigger pool**	**Whether ASSIST's limit is beds or cash, and whether the ICB and the council already fund the other two**

Floor: £12,000 + £18,000 = £30,000. Target: £30,000 + £20,000 = £50,000. Ceiling: £50,000 + £18,000 + £20,000 = £88,000. The target moved by more than a third in verification, down from £83,000. ASSIST was cut from 20 places to 10 (minus £18,000), and a £15,000 Citizens Advice caseworker was dropped: the charity already has £6.16 million (US$8.26 million) in income and a council core grant, no gap was shown, and its Trusted Assessor role makes a free referral enough. Staff and session costs are our assumptions, not quotes, and the £7,475 figure doesn't price outreach. If the ICB funds vaccination, the floor is £18,000 (US$24,100).

RECIPIENT	USE	AMOUNT	MECHANISM	BASIS	VERDICT
Archer Project, with a pharmacy or nurse partner	Flu and pneumococcal sessions in homeless services (action 2)	£12,000 (US$16,000)	Direct grant, released only if the ICB confirms the gap	32 sessions × £375 (US$503), both our assumptions. £7,475 per QALY models the older general programme, not this one	Partially confirmed
ASSIST Sheffield	10 extra winter places for refused asylum seekers (action 4)	£18,000 (US$24,100)	Restricted grant	10 × 4 months × about £450 (US$600), from accounts: an average, not a marginal bed cost. No mortality evidence	Partially confirmed
Archer Project	Winter engagement worker, for people who refuse or lose emergency rooms (action 3)	£20,000 (US$26,800)	Restricted grant, only if confirmed unfunded	1 FTE × 5 months at £35,000 (US$46,900) ≈ £14,600, plus £5,400; our assumptions. Possible overlap with £514,901 (US$691,000) from the Ending Homelessness in Communities Fund	Partially confirmed
ASSIST Sheffield	10 more places, to 20 (action 4)	£18,000 (US$24,100)	Top-up, on written confirmation of rooms	Same arithmetic. 20 places is 43% more beds than it had, so unproven	Partially confirmed

* Suggested formulation: check with a health worker before sharing.

RECIPIENT	USE	AMOUNT	MECHANISM	BASIS	VERDICT
South Yorkshire Community Foundation (holder to be confirmed)	Trigger pool: flood or outage (action 11)	£20,000 (US$26,800)	Pooled cash	About 33 grants at the Storm Babet maximum of £600 (US$805). The foundation spent £2.96 million (US$3.97 million) in 2025	Partially confirmed

The funder's one thing: government has just paid for the roof, with £1,441,797 for rough sleeping and £9,970,109 for crisis support. Private money should buy what public money legally or practically cannot: refused asylum seekers, and a free vaccine actually reaching an arm in a hostel. Almost anything else here risks displacing a budget that is already committed.

Do not do this

CONTRAINDICATED · ADVICE THAT WOULD COST LIVES OR WASTE THE WINDOW HERE

Advice that circulates for this hazard and would do harm or waste the window here. No ranked action was contraindicated in verification; these are the panel's warnings, each checked.

Do not go near a flooded river edge, and never step into moving water on foot or from a car

CONTRAINDICATED

Sheffield's 2007 deaths came this way. The coroner's record for the 14-year-old at Millhouses Park is that the water hid the edge, and a 68-year-old was lost near the Wicker area. The Sheaf and Porter reached levels around or above 2007 in Storm Babet.*

* Suggested formulation: check with a health worker before sharing.

Instead: Stay on high ground and away from walls and banks beside the river, and leave your car in place rather than wade from it. Call 999 if someone is in the water; do not go in after them.

Do not heat a flat with a barbecue, camping stove, or an open oven

CONTRAINDICATED

UKHSA warns that barbecues and camping stoves indoors can kill through carbon monoxide. Landlords must fit CO alarms only in rooms with a fixed combustion appliance, excluding gas cookers, so an all-electric flat may have none (our inference). An open oven was reportedly suggested to a Lightbox tenant; an electric oven is not a CO source, but it is not a room heater either. Do not dry clothes on heaters.*

Instead: Report the failure in writing, use layers, and use the Private Housing Standards route.

Do not wedge flat fire doors open, or charge batteries on escape routes or while you sleep

CONTRAINDICATED

Fire services say you must not wedge open fire doors, and the Leeds study's authors said residents doing so in hot flats "negated fire safety requirements". South Yorkshire Fire and Rescue warns about charging on escape routes and communal areas. This is not a high-rise scare: fire spread beyond the room was lower in high-rise (6.8%) than in low-rise flats (9.1%), and smoking remains a leading cause of fire deaths.*

Instead: Test your alarms, charge while awake, and use the Fire Service online home safety check.

Do not treat a flood warning sign-up or a sandbag drive as the defence for flats and basements

CONTRAINDICATED

The warning service does not cover surface water, and Central Quay's car park flooded as rain poured in. Sandbags do little for a basement car park or an upper-floor flat (our inference; we found no Sheffield guidance).

* Suggested formulation: check with a health worker before sharing.

Instead: Sign up, but also move cars on heavy-rain warnings, and have the managing agent plan for the basement.

Do not blame tenants' laundry for mould, or tell private renters that Awaab's Law protects them

CONTRAINDICATED

Government guidance calls blaming "lifestyle choices" "totally unreasonable" and names laundry as unavoidable moisture. Awaab's Law applies only to social housing for now: consultation on private renting closes on 18 December 2026, and no start date exists.

Instead: Check the extract fan, then report the problem in writing. Landlords' existing duties under section 11 apply today.

Do not open dormitory night shelters as the default, or claim they cut homeless deaths

CONTRAINDICATED

Government operating principles say shared airspace carries "higher levels of risk" and put single rooms first. Communal sleeping is a conditional fallback, and it is not banned. No figure shows shelters reduce deaths: the ONS's 2013–17 analysis found no clear seasonal pattern in homeless deaths, and in the latest bulletin 31.2% were drug poisonings.

Instead: Use single rooms first, and take Director of Public Health advice if communal space is the only option left.

Do not tell every student to get a free flu jab

CONTRAINDICATED

Students are not an eligible group as such, so most healthy under-65s will be turned away or asked to pay. Blanket messages waste the attention of the people who do qualify: those with clinical risks, carers, and people sleeping rough or in hostels.*

* Suggested formulation: check with a health worker before sharing.

Instead: Target those groups. Everyone else can pay about £17–£22 (US$23–US$30) privately if they want it.

Do not count warm-space visitors as success

CONTRAINDICATED

No studies directly assessed health outcomes. In Gateshead users came by chance or word of mouth, stigma and travel were barriers, and homeless and drug-dependent people risked exclusion.

Instead: Ask whether the people with no heating or no daytime refuge were reached.

Do not stockpile food at the hubs this autumn as the El Niño response

CONTRAINDICATED

The forecast peak is July 2027, and stock is not the constraint. That peak is one trade-body forecast, and no direct stockpiling study was found, so this rests on timing logic. The Crisis Fund guidance also says cash-first does not mean cash-only.

Instead: Fix access now, and hold cash for the price rise.

Do not fund retrofit or general fuel cash here as a lifesaving El Niño measure

CONTRAINDICATED

NICE's modelling put retrofit at £149,000–£158,000 (US$200,000–US$212,000) per QALY for people 65+ on health alone, though £28,000–£34,000 (US$38,000–US$46,000) for COPD households and better once energy savings count. £3,406,008 (US$4.57 million) of Warm Homes money already covers about 221 homes, and retrofit can't finish before the peak.

* Suggested formulation: check with a health worker before sharing.

Instead: Use the existing Warm Homes route, and target anything new at COPD and the very few frail older households here.

Do not tell people El Niño will bring a Sheffield flood or a big freeze

CONTRAINDICATED

The Met Office says a very strong event "does not automatically mean more severe impacts for the UK". Its November–January outlook gives double the likelihood of a wet three months and more storms than usual, yet adds that "the likelihood of near average or dry conditions remains significant". A false alarm costs trust.

Instead: Run this as an ordinary-winter plan with slightly worse odds of wet and stormy weather.

WHAT HAS HAPPENED HERE BEFORE — THE RECORD

YEAR	EVENT	TOLL	WHAT CHANGED AFTER
1864	Great Sheffield Flood: a dam failure, not climate	238–270 across sources	Waterworks Act and engineering reform
Feb 1947	Snow and cold; coldest month on record	Not known	Not recorded
Feb 1962	Great Sheffield Gale (ONI −0.16)	3–4; sources differ	Disaster-area status; no lasting reform found
Jul 1973	119.2 mm in one day (ONI −0.99)	Not known	Not recorded
Dec 1991	River Sheaf flood at the station (ONI +1.18, El Niño)	Not known	Sheaf scheme still unbuilt

* Suggested formulation: check with a health worker before sharing.

YEAR	EVENT	TOLL	WHAT CHANGED AFTER
Jun 2007	Don and Sheaf floods; Neepsend substation inundated (ONI −0.41)	2 in Sheffield, both on foot	Flood programme began; Lower Don finished 2018
Dec 2010	Snow and cold (ONI −1.57, La Niña)	Not known	None found
Nov 2019	82 mm in 24 hours; gates shut 04:30; Meadowhall stranding (ONI +0.72, weak warm)	None reported	Defences held in the main
Jul 2022	38.9°C at Weston Park (ONI −0.70)	391 (156–625) in Yorkshire and the Humber, all summer; no city figure	No local change found
Oct 2023	Storm Babet (ONI +1.74, El Niño). Sheaf and Porter around or above 2007 levels	None reported	Sheaf and Porter need affirmed; outline case April 2028
Jun 2026	34.2°C, a June record; trams suspended	England 2,877 in May and June (interim); no city figure	No local scheme found

ENSO values are from NOAA PSL's ONI series and may differ slightly from the CPC table. Several early rows rest on Wikipedia. The historian's one thing: the 2023 flood report says Babet's Sheaf level at Highfield was second only to 1991, and both fell in El Niño seasons, while the latest ONI is +2.46. That is two events on one gauge and proves nothing: the Don's worst, 2007, was neutral, and an unopened press snippet gives different Highfield levels. But the Sheaf's outline business case is due in April 2028, 37 years after 1991. The river mostly stays underground beneath the station, and Castle Park, where a stretch is being opened up, is now due in summer 2028.

WHERE THE EXPERTS DISAGREE

UNRESOLVED

- **Pre-commit council cash on triggers** (Economist) versus **fuel cash is poor value for lives** (Philanthropist, on NICE's modelling). Kept as crisis relief, sized by us, and the flood half is unaffected. A trial of a one-off payment would settle it; NICE modelled a recurring £200 (US$268) subsidy.
- **List warm spaces** (Frontline) versus **no evidence they protect health** (Skeptic). Kept as an access aid only, with no health claim.

* Suggested formulation: check with a health worker before sharing.

- **Keep winter shelters because they may protect** (Public Health) versus **dormitories spread infection** (Skeptic). Single rooms first. No UK shelter outbreak data or protective figure was found.
- **Cold is the wrong frame for this ward** (Public Health: pro rata, about 0.08 cold deaths a winter among its older residents, our estimate) versus **failed heating is a real local harm** (Frontline). Both hold: failed heating here costs misery and dangerous improvising more than it costs counted deaths. Sheffield's winter excess of 12.9% (6.8–19.4) is rated similar to England's 8.1%, so it isn't presented as worse.
- **Don't brand this El Niño** (Skeptic) versus **the Met Office's wetter odds are real** (Emergency Manager). The November–January outlook doubles the odds of a wet three months at national scale, and it doesn't forecast a Sheffield flood.

WHAT NOBODY COVERED — BLIND SPOT

Three gaps could change this. No one has a death count for this ward, so the ranking leans on city-wide and national data. We found no current evidence on night and outdoor workers, or on distrust of officials. And the ward moves faster than its data: 21,484 people in 2021, an estimated 28,529 in mid-2024, with 9,093 in student halls and other communal homes. Household percentages exclude those residents, and halls management, who could reach thousands of students in one message, was not researched. Ward boundaries are also under review.

HOW TO READ THIS — METHOD

The panel is author-built. Eight simulated expert lenses were used to generate these recommendations. Where they agree, that is a strong hypothesis, not a consensus of the field. Every recommendation was then independently checked for evidence, transferability to this location, and feasibility before the peak; the verdict tags carry the result.

Heat figures are for England, not this ward. The tracker counts heat only; flood, cold, and food risks are carried here by the historical record, not by a published number.

HOW THIS BRIEFING WAS PRODUCED — METHODOLOGY

- **Scope.** The requester typed "Sheffield", and this was built for downtown Sheffield, UK. It is taken as Sheffield City ward (E05010862) plus the Kelham and Neepsend riverside. Kelham is in City ward. Neepsend is split between City and Hillsborough wards, judged by sampling postcodes, not from an official map. Sub-city detail is used for hazards and action design, not for death counts.

* Suggested formulation: check with a health worker before sharing.

- **Exposure.** Climate Impact Lab El Niño Heat Mortality Tracker data, file `v261026_adm1_output_BASE_rounded_cust.csv` (version of 26 October 2026, pre-peer-review): England (GADM GBR.1_1), 800 additional heat deaths June–September 2026 (June 260, July 300, August 180, September 68; the months sum to 808 because of rounding), 17 forecast October 2026 – March 2027 (October 16, November 1, every later month 0), 820 in total; the UK, 840; the world, 857,400. This update supersedes the September report *451,000 at Risk*. Method: ECMWF SEAS5 seasonal forecasts applied to temperature–mortality relationships against a 1996–2025 baseline. The figures count heat only; we inferred this from the data, because cold countries show exactly zero in every winter month. They are never added to the Impact Map's long-run projections. UKHSA's separate interim estimate of 2,877 heat-associated deaths in England in May and June 2026 alone is far higher. It measures all heat-associated deaths, while the tracker measures an El Niño departure from a baseline, so the two aren't directly comparable and are not added.
- **Expert panel.** Eight simulated expert lenses (emergency manager, public health scientist, frontline responder, skeptic, economist, historian, philanthropist, and food supply chain analyst) each researched this place independently and in parallel, from web sources, to a fixed brief.
- **Reconciliation.** Duplicate actions were merged and backing lenses recorded. Convergence was tested for shared bias before it counted in an action's favour. Contradictions were kept, not resolved by dropping a side. Actions were ranked by expected lives saved per unit of effort before the peak, each was given a named payer or owner, and the funding placements were reconciled against the ranked list. Two proposed actions were removed because they already happen: closing the Don gates on warnings, and clearing culvert entrances before storms, though the Sheaf Screen schedule and private Porter culverts remain worth confirming in writing.
- **Verification.** Seven separate verifier agents checked every recommendation on evidence, transferability, and feasibility. Financial actions were also checked for availability in this jurisdiction, a named payer, a trigger threshold, and whether they already exist. The funding envelope was checked for real recipients, published unit costs, and duplication, then re-summed.
- **Who does what.** The RACI chart is built from the owners named in the verified actions, with one accountable party per action. It is a proposal: no organisation named in it has been contacted or has agreed to a role.
- **Verdicts.** *Confirmed*: evidence, transferability, and feasibility all hold. *Partially confirmed*: holds after the corrections shown. *Unverified*: could not be checked to a primary source. *Contraindicated*: would do harm or waste the window here. Do-not cards carry the Contraindicated heading as advice to avoid, and four were confirmed as written.
- **Adaptation Inventory.** Could not be consulted for the UK: the page loaded with its counter at 0, and the download page exposed no file link. No action is tagged with a precedent from it. An earlier reading for another UK briefing found no UK entries.
- **Money.** Costs are shown in pounds sterling with US dollars in parentheses, at £1 = US$1.3415 (Pound Sterling Live daily close, a market source, 3 November 2026). Most sizing here is our estimate, and each is labelled.

* Suggested formulation: check with a health worker before sharing.

- **Reader.** No role was given, so the For you section is written for a resident. Its steps were taken from the verified actions and from what the panel found about residents here; steps not drawn from a ranked action were verified on the same three tests. The rest of the report is written for the city and its partners.
- **Health wording.** Passages where a wording error could hurt someone (naloxone, vaccines, heating and fire, medical equipment in a power cut, cooling, and when to call 999) are marked "* Suggested formulation: check with a health worker before sharing." They were checked against published sources, not by a health professional. They are suggestions, not medical advice, and anyone passing them on should confirm them with a doctor, pharmacist, or nurse first.
- **Rules.** No cost is derived by dividing a published total without showing it and labelling it an estimate, and no local figure is invented; where data is thin, the report says so and shows the containing geography's number. Every source is listed below.
- **Limits.** The panel and verifiers are AI research agents working from web-available sources, not human experts, and no one in this place was interviewed. Northern Powergrid, Groundwork, NICE's own pages, and most of The Star returned errors, so some claims rest on archives, mirrors, or search excerpts (listed below). Charity accounts were read through a mirror, not the Charity Commission. Many pages were read through a summarising tool, so quotations should be checked before reuse. Phone numbers were taken from official pages, but listings can change: phone before relying on a service's hours.
