Woodberry Down and Manor House, London N4

This El Niño probably won't bring a deep freeze to Woodberry Down. The danger is flu and RSV in a borough where only about half of over-65s are vaccinated, and cold homes in the old estate blocks and shared heating systems. It also comes as food prices next summer, when every winter scheme has closed. The group at risk is small and can be found: about 200 people over 80, and 364 people over 66 who live alone. The most lives are saved by getting RSV and flu jabs, money, and a knock on the door to those people before December. Landlords should be held to their legal duties on damp, mould, cold, and heating outages.

IMPACT REGION	EXCESS HEAT DEATHS	WINDOW	DOMINANT HAZARD
The Climate Impact Lab region containing the London Borough of Hackney (about 260,000 people, roughly one region; region name not resolved). Woodberry Down ward is in its north-west	No figure published for the UK or Europe	Jun 2026 – Feb 2027 (heat only; not this hazard)	Flu, RSV, and cold homes in ordinary cold weeks; short cold spells; communal heating outages; a food-price rise in 2027; surface-water flooding and burst mains (any season)

EXECUTIVE SUMMARY — AT A GLANCE

51.57°N 0.09°W, United Kingdom · Natural Earth

- **The risk.** The danger is flu and RSV in a borough where only about half of over-65s are vaccinated, and cold homes in old estate blocks; about 200 people over 80 and 364 over 66 living alone are most at risk.
- **First action.** City and Hackney GP practices, pharmacies, and the Manor House Development Trust take RSV and flu vaccination to the door, block by block, starting with everyone 80 and over, before December.*
- **The money.** £15k floor, £45k target (£25k if no bill-credit route by 30 November), £75k ceiling; the best-value pound gets frail residents found and referred into the council's £1m crisis money and NHS vaccines.
- **Do not.** Do not answer damp and mould reports with "ventilate and heat more" leaflets in place of a repair.*

* Suggested formulation: check with a health worker before sharing.

corner, where Hackney meets Haringey and Islington			

23/23 recommendations checked. 14 corrected (partially confirmed), 1 unverified, 7 contraindicated (three of them narrowed by verification), and 1 proposed warning dropped as unsupported. No action survived verification without a correction. One proposed action, winter protections on the estate's heat network, turned out to be already law, so it was rewritten as a compliance check. **Biggest corrections:**

- RSV vaccine eligibility widened to everyone 80 and over on 1 April 2026, so the catch-up leads with them.*
- Crisis-fund money cannot be carried between years. The 2027 food-price peak has to be met from Hackney's 2027/28 allocation, not by holding back this year's.
- Awaab's Law adds excess cold to social landlords' repair deadlines from 30 November 2026, which lands inside this winter.
- The only care home in the ward is a small mental-health home, so care-home staff vaccination drops down the list.

The funding target is £45k (floor £15k, ceiling £75k), unchanged after verification. It falls to £25k if no organisation can pay winter energy bills on GP referral. **The El Niño premise was tested, not assumed,** from 43 winters of records at Hampstead, about 4 km away, carried over from the E17 Walthamstow briefing of 11 October. **Exposure figure:** Climate Impact Lab, September 2026, pre-peer-review, publishes none for the UK. Health figures below are for Hackney (flu figures include the City of London); population figures are for Woodberry Down ward.

* Suggested formulation: check with a health worker before sharing.

Hampstead daily records, winters 1973–74 to 2015–16 (the record ends in July 2016), classed by the December–February Oceanic Niño Index. Heathrow's complete temperature record to 2024–25 was used as a cross-check. Only four or five winters were strong El Niños, so read every difference as a tilt, not a rule.

WINTERS	DEC–FEB MEAN (°C)	NIGHTS AT OR BELOW −3 °C, DEC–MAR	JAN–MAR DAYS WITH MEAN AT OR BELOW 0 °C	WINTERS WITH A 7-DAY RUN AT OR BELOW 0 °C	WINTERS WITH A 3-DAY RUN AT OR BELOW 2 °C	OCT–FEB RAIN (MM)
Strong El Niño (4)	5.6	3.3	2.0	0 of 4	3 of 4	281
Moderate or weak El Niño (11)	4.7	6.2	4.6	3 of 11	10 of 11	397
Neutral (13)	4.4	8.9	7.3	6 of 13	11 of 13	358
La Niña (15)	5.0	6.1	4.5	2 of 15	11 of 15	284

- **Strong El Niño winters here have been mild.** They were the warmest class and had the fewest frosts. None produced a 7-day freeze, which is the run that triggers the government's Cold Weather Payment (£25 a week, 1 November to 31 March). 2015–16, the last very strong event, averaged 7.2 °C with no hard frosts. Heathrow tells the same story: 6.6 °C in strong winters, against 5.4 °C in neutral ones.
- **Short cold spells still came.** Three of the four strong winters had a spell of three days at or below 2 °C. That is about where cold harms health, so plan for short cold spells, not for a deep freeze.
- **The counter-example is 2009–10.** Its index sat at 1.47, just under the strong threshold. It averaged 2.6 °C, with 15 hard-frost nights and a 7-day freeze, so nobody should plan on a mild winter either.
- **A mild winter is not a safe one.** Excess winter deaths in England follow the flu strain at least as much as the thermometer. In this ward the variable that matters is vaccine uptake, not the temperature anomaly.
- **What the Met Office says.** *"For the UK, El Niño increases the chances of a wetter and stormier late autumn and early winter period, which would also likely be milder than normal."* Later in winter there is *"an increased chance of Sudden Stratospheric Warming (SSW) events… increasing the potential for cold weather"* (Met Office blog, 23 September 2026).

* Suggested formulation: check with a health worker before sharing.

- **A young ward with a small older minority who can all be found.** Woodberry Down ward had 12,113 residents at the 2021 Census. 918 were 65 or over, 343 were 75 or over, and 202 were 80 or over. 364 households were one person aged 66 or over living alone, 7.4% of 4,932 households. 46.4% of households rent from a social landlord and 34.8% rent privately; 14.2% of residents are disabled.
- **Vaccine uptake has collapsed.** Flu vaccination among over-65s in Hackney and the City of London fell from 61.4% in 2022/23 to 58.8% and then 53.5% in 2024/25 (15,274 of 28,549), against 74.9% for England. That leaves about 13,300 older residents unvaccinated, one of the lowest rates in London. No 2025/26 figure has been published.
- **The neighbouring community is under-immunised too.** City and Hackney had 81% first-dose MMR coverage at age 5 in 2022/23, among the lowest in England, and Hackney had the second-highest measles rate in England in January to June 2025. Poliovirus was found in Hackney's sewage in 2022. Stamford Hill's Charedi Orthodox Jewish community reached 64.3% COVID antibody prevalence by late 2020. This sits next to the ward, not in it, but infections cross the road.
- **The buildings carry much of the risk.** The estate was built from 1946 to the early 1950s. Most of its original homes were judged beyond economic repair in 2002, for damp, poor insulation, and failing services. Phases 5 to 8 of the rebuild were approved in September 2025, replacing 692 social homes with 583, so some residents will spend several more winters in the old blocks. The new blocks take heat from a shared network supplied by Berkeley Homes and billed by Insite Energy, with a standing charge that is due whether or not heat is used.
- **The landlord record is poor.** In May 2022 the Housing Ombudsman found Hackney Council guilty of severe maladministration over damp and mould. A special investigation opened in December 2023 found maladministration in 79% of cases it examined and in 87% of damp and mould cases. In winter 2024–25, Hackney's council-run Shoreditch heat network in Hoxton left more than 450 households with tepid or no heating, with only 3 of 10 boilers working, after the council had said service was restored.
- **Recorded illness looks low only because the borough is young.** GP-recorded COPD (1.0%), heart failure (0.73%), and diabetes (6.0%) are below England's rates, but these are crude rates in a young borough. Fuel poverty is 9.0% of Hackney households on the government's measure, which probably understates it in flats; a charity estimate for the Hackney North constituency is 12.2%.

The honest finding is that El Niño's food signal here is real but weak and late. Rent, benefits, and the two-child limit drive demand far more than world crop prices.

* Suggested formulation: check with a health worker before sharing.

- **London will not run short of food; the risk is price.** UK food inflation was 1.3% in August 2026 (ONS). The Food and Drink Federation forecasts 3.9% by December and a peak of 6.4% in July 2027, staying high into 2028. Fresh produce comes through New Spitalfields Market in Leyton, and no El Niño weak point was found in London's distribution.
- **The exposed staples are rice, sugar, palm oil, and cocoa.** They matter most to the South Asian, West African, and Turkish and Kurdish kitchens around Green Lanes. In the last El Niño, India banned non-basmati rice exports on 20 July 2023; Thai rice prices rose 14% and Vietnamese 22% (IFPRI). No ban has been announced this year.
- **Kosher food already costs more, and its prices rise faster.** During the 2022 price surge, kosher food inflation ran at about 30% against about 12% nationally (Jewish News). Hackney's school-holiday food vouchers ended in September 2026, as the national fund moved away from holiday food support.
- **Food help is stretched.** Hackney Foodbank fed more than 7,200 people in 2025 (302,571 meals), about 680 a week, with demand up 300% on 2019 and 65% of its food going to families with children. Woodberry Aid, the estate's own food project, holds a £12,320 council grant for April to September 2026. About 1,358 Hackney families were not claiming Healthy Start in 2023 (Hackney Foodbank estimate). About 3,450 Hackney households were in temporary accommodation in 2024, some in rooms with no kitchen.
- **Food banks buy at retail too.** A 6% price rise cuts what their money buys just as demand climbs, so price-indexed grants and cash routes matter more than warehouses.

WHAT THIS PLACE SHOULD DO

RANKED BY LIVES PER EFFORT

The first four actions carry nearly all the expected deaths this winter: they reach the oldest, poorest, and most isolated residents before December. Actions 5 and 6 hold landlords to duties that already exist. Actions 7 to 9 cover clinical risk and emergencies. Actions 10 to 12

* Suggested formulation: check with a health worker before sharing.

prepare for the 2027 food-price peak. Actions 13 to 15 are compliance checks and lower-value measures.

1. Take RSV and flu vaccination to the door: everyone 80 and over first, then housebound and 75+ residents, block by block, before December, promoted on paper and through community groups*

PARTIALLY CONFIRMED | PUBLIC HEALTH · HISTORIAN · PHILANTHROPIST · FRONTLINE | ADAPTATION INVENTORY: NONE FOUND FOR THE UK

OWNER	BY WHEN	COST	PREVENTS
City and Hackney GP practices or GP Confederation under NHS North East London's housebound arrangement; pharmacies; Manor House Development Trust finds and books people	Lists by 31 October; visits by early December	NHS-funded vaccines; £12k outreach (see funding)	RSV and flu admissions and deaths among the oldest, in a borough where about half of over-65s are unvaccinated

The RSV vaccine was 82.3% effective (95% CI 70.6 to 90.0) against RSV hospital admission in adults aged 75 to 79 in England in 2024/25 (Lancet Infectious Diseases 2025, a test-negative study). Since 1 April 2026 everyone 80 and over and care-home residents are eligible, and the NHS has been inviting unvaccinated over-80s since July. The ward has 202 people over 80, so a door-by-door list is realistic. The NEL housebound arrangement lets district nurses, GP confederations, and practices vaccinate housebound patients for flu and RSV where the GP practice delegates it. In October 2021 a Stamford Hill pop-up clinic vaccinated nearly 350 people against COVID and was extended for five weeks; it was promoted by flyering, newspapers, and local community groups. Use the same model, through the Redmond Community Centre, the Woodberry Down Muslim Community charity, and the Interlink Foundation for Charedi neighbours.

* Suggested formulation: check with a health worker before sharing.

Corrections: the 82.3% figure covers ages 75 to 79 and hospital admissions, not deaths. Who actually runs housebound vaccination in City and Hackney this year was not confirmed; ask the GP Confederation. Flu vaccine's effect on deaths is uncertain: Anderson, Dobkin & Gorry (2020) found no measurable fall in deaths at England's age-65 cutoff, which is why the frailest oldest come first.

2. Get money to older people before December: check that local groups can refer residents to Hackney's crisis payments, push Pension Credit claims, and fund benefit casework for over-75s

PARTIALLY CONFIRMED | ECONOMIST · PHILANTHROPIST · HISTORIAN · FRONTLINE | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney Council (Here to Help); Age UK East London; Manor House Development Trust and Woodberry Aid refer	Referral status by 31 October; casework November to January	£10k Age UK East London caseworker (see funding); benefits paid by DWP	Cold-home and heat-or-eat harm among pensioners entitled to money they do not claim

Hackney's crisis payments, a £1m fund in 2026/27 run by Here to Help, take referrals through 25 "Trusted Referral Partners", and the council says it "may use data to identify residents." The partner list is not published. If Manor House Development Trust (which runs the Redmond Community Centre) and Woodberry Aid are not on it, adding them costs nothing and is worth more than any private grant here. A successful Pension Credit claim unlocks the Winter Fuel Payment, the Cold Weather Payment, and council tax support, and can be backdated three months. In 2019, Age UK East London estimated 6,427 Hackney pensioners were not claiming, about £26.8m a year.

* Suggested formulation: check with a health worker before sharing.

Corrections: the Pension Credit figures are from 2019; no newer Hackney estimate was found. The Mayor of London has run a Pension Credit letter campaign with 25 boroughs since 2023; check whether Hackney is one before proposing a new mailing. The £10k caseworker cost is an estimate (13 weeks at a loaded £40k a year), not a published unit cost. A claim made now will not bring this winter's Warm Home Discount, whose qualifying date was 23 August.

3. Hackney adds one rule to its crisis payments: an amber cold-health alert releases a cash energy payment to pensioner households it already knows are in need, and next year's allocation is planned around the July 2027 food-price peak

PARTIALLY CONFIRMED · ECONOMIST · SKEPTIC · PUBLIC HEALTH · FOOD SUPPLY

ADAPTATION INVENTORY: ANTICIPATORY CASH, MONGOLIA (PRECEDENT OUTSIDE THE UK)

OWNER	BY WHEN	COST	TRIGGER
Hackney Council, from its DWP Crisis and Resilience Fund grant	Rule agreed by 30 November; 2027/28 plan by March 2027	£100k per 1,000 households at £100 each (arithmetic, not a costing): 10% of the £1m crisis-payment fund	UKHSA amber cold-health alert for London (winter); ONS food inflation (2027; see action 12)

Hackney's Crisis and Resilience Fund is £6.1m in 2026/27, £6.1m in 2027/28, and £5.9m in 2028/29, and unspent money is clawed back by DWP. DWP's guidance makes crisis payments cash-first and lists utilities as an eligible need. The only automatic cold payment, the Cold Weather Payment, needs a 7-day freeze that none of London's strong El Niño winters produced, so without a local rule no money moves on a cold spell. The crisis-payment line rises to £1.5m in 2027/28, which is the money that can meet the food-price peak.

* Suggested formulation: check with a health worker before sharing.

Corrections: the guidance has no explicit wording on proactive payments; Hackney's own "may use data to identify residents" is the closest, so whether payments can go out without an application is unverified. Each year's money must be spent within that year, so this year's fund cannot be held back for 2027. Most of Hackney's visible spend so far is a £3.5m grant pot for community groups, not cash to residents.

4. Phone or visit every older person living alone during each 3-day cold spell, visit households moved into new homes this winter within a fortnight, and register them on the energy Priority Services Registers

PARTIALLY CONFIRMED · FRONTLINE · EMERGENCY MGR · ECONOMIST · PHILANTHROPIST

ADAPTATION INVENTORY: TORONTO COLD ALERTS, NO EFFECT (A CAUTION)

OWNER	BY WHEN	COST	TRIGGER
Woodberry Aid volunteers and Manor House Development Trust; Woodberry Down Community Organisation supplies the moving schedule	Phone tree by 15 November; every cold spell, November to March	Volunteer time; £3k hot-meal contingency (see funding)	A forecast of three days at or below 2 °C, or a UKHSA amber cold-health alert

364 people over 66 live alone in the ward. In 2020 the Manor House Development Trust cooked hot meals at the Redmond Community Centre and Woodberry Aid volunteers delivered them, with prescriptions and food parcels; Woodberry Aid still operates and holds a council grant. A household that has just moved has a new boiler or heat-network meter, a new tariff, and often a GP and pharmacy it has not yet registered with. The visit checks that the heating works and is understood, that prescriptions follow, and that the household is on the UK Power Networks and supplier registers, and the heat network's register for new blocks. Hackney's 2020 cyberattack took benefit records offline for months; keep the list on paper as well.

* Suggested formulation: check with a health worker before sharing.

Corrections: the "double decant" approved in July 2026 has not started. About 21 of 32 secure-tenant households in Phase 5 face a second move, before Phase 4 homes are ready in 2030. This winter's moves are ordinary moves into completed blocks. Evidence is thin: no study shows check-ins reduce cold deaths, and alerts alone do not (Toronto: risk ratio 0.98). The knock is the intervention; the alert only times it. The 2024 estimate of 957 residents over 65 could not be verified, so Census counts are used.

5. Agree a heating-outage plan for every block on shared heating: a paper list of vulnerable households in each block, heaters and an electricity credit on day one, and no outage closed until a door check confirms flats are warm *

PARTIALLY CONFIRMED | SKEPTIC · EMERGENCY MGR | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	TRIGGER
Berkeley Homes (the heat supplier), Notting Hill Genesis, and Hackney Housing, with Hackney Emergency Planning	1 November	About 200 plug-in heaters, roughly £6k (lens estimate, not verified)	Any outage on a shared plant

Shared heating fails for whole blocks at once, and repairs can stall over who pays. In a Notting Hill Genesis block elsewhere (case 202404192, July 2025), the Housing Ombudsman found maladministration for slow assessment of a household's needs and slow supply of heaters during outages from November 2023; the plant served about 160 flats and was run by a residents' management company. In Hoxton in winter 2024–25, more than 450 council households had tepid or no heat after the council said service was restored. On the new blocks, Berkeley supplies the heat and Insite only meters and bills it, so the plan is Berkeley's to make.

* Suggested formulation: check with a health worker before sharing.

Corrections: the Notting Hill Genesis case is not on Woodberry Down; it shows how such outages go wrong, not that they have happened here. No heating failure at Woodberry Down itself was found. The case found ordinary, not severe, maladministration and made no finding on a resident's hospitalisation.

6. Put every damp, mould, and cold report in the old blocks on Awaab's Law deadlines, move vulnerable tenants first, and help private renters build a written record for environmental health

PARTIALLY CONFIRMED | SKEPTIC · HISTORIAN · FRONTLINE · PUBLIC HEALTH · ECONOMIST | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney Housing and Notting Hill Genesis; Woodberry Down Community Organisation and community groups help tenants report	Now for damp and mould; from 30 November for excess cold	Landlords' statutory repair duty; dehumidifiers not costed	Mould and cold left unrepaired in condemned blocks over another winter

Awaab's Law has bound social landlords to fixed deadlines for damp, mould, and emergency hazards since 27 October 2025. Phase 2, laid before Parliament on 13 July 2026, adds excess cold from 30 November 2026, subject to approval. Residents of the remaining old blocks should report in writing so the clock starts. Private renters, 34.8% of households, are not covered yet, so dated photos and written requests to the landlord, then a referral to Hackney's environmental health team, are their only route.

* Suggested formulation: check with a health worker before sharing.

Corrections: the second Hackney "severe" finding in December 2023 was in fact the launch of a special investigation. The commonly quoted "31 of 57 blocks beyond repair" figure could not be verified; the 2002 survey is reported only as "most homes." Retrofit evidence (Welsh schemes cut respiratory GP visits among people already ill) does not measure deaths.

7. A Warm Home Prescription for about 20 GP-referred residents with COPD, heart failure, or similar conditions: energy bills paid for the winter

PARTIALLY CONFIRMED | PHILANTHROPIST | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
GP practices and social prescribers refer; CREW Energy delivers if it can pay bill credits, otherwise Fuel Bank Foundation	Referral route by 30 November	£20k (see funding)	Clinically vulnerable people rationing heat

Sheffield Hallam's evaluation of the 2022/23 Warm Home Prescription trial (823 patients in Aberdeen, Middlesbrough, Gloucestershire, and London) found an average cost of about £1,000 per household, 70% of it on bills, with warmer homes, better self-reported health, and emerging evidence of lower NHS use. CREW Energy, a community benefit society, already does home energy visits as Hackney's partner and is sending 1,200 winter warm-home packs in the borough.

* Suggested formulation: check with a health worker before sharing.

Corrections: the evaluation is not peer-reviewed, was funded by BP, and measured no deaths. No Warm Home Prescription runs in Hackney, and CREW has no record of paying bills, so the grant is conditional on it confirming a bill-credit route. The latest national phase paid up to £245 a household, so £20k may reach more than 20 households.

8. Flu vaccination for the home-care workers who visit the ward's housebound residents

PARTIALLY CONFIRMED | PUBLIC HEALTH | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney adult social care commissioning and home-care providers; NHS North East London	By mid-November	NHS-funded for eligible frontline social-care workers	Flu carried into the homes of the housebound

In care homes, vaccinating staff probably cuts residents' all-cause deaths from about 9% to 6% (risk ratio 0.69, 0.60 to 0.80; Cochrane 2025, moderate certainty). In the best single trial (Hayward 2006, 44 UK care homes), resident deaths fell by 5.0 per 100 in a moderate flu season and not at all in a quiet one.

Corrections: the only care home in the ward, Riverside House on Seven Sisters Road, is a 9-bed home for adults with mental-health conditions, not older people, so the care-home evidence applies here only by extension to home-care workers. No trial covers home-care staff. Cochrane notes that the fall in deaths is not explained by flu outcomes, so read it cautiously.

9. Pre-designate the Redmond Community Centre as the estate's warm rest centre, with a named key-holder, heating, and phone charging

PARTIALLY CONFIRMED | EMERGENCY MGR | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney Emergency Planning with Manor House Development Trust	31 October	Under £2k (lens estimate)	Moving frail people across Seven Sisters Road at night in a burst main, flood, or block heating failure

* Suggested formulation: check with a health worker before sharing.

Burst trunk mains recur here. On 8 October 2019 a burst main flooded part of N4 and the West Reservoir Centre off Green Lanes was staffed overnight. On 11 December 2016 a burst main in Northwold Road, Stoke Newington, hit about 150 properties and 350 people were evacuated to Stoke Newington Town Hall. In August 2022 a 36-inch main burst on Hornsey Road, nearby in Islington.

Corrections: the 2016 event was in Stoke Newington, not N4; the 2019 N4 burst is the local precedent. Redmond's suitability (backup power, capacity, out-of-hours access) was not checked. Manor House Development Trust is registered under that name and appears to operate as London Development Trust; the link is not confirmed.

10. Hackney enrols eligible children for free school meals from its own benefits data before the January 2027 school census, and pushes Healthy Start claims

PARTIALLY CONFIRMED | FOOD SUPPLY · FRONTLINE | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney Council education and benefits teams; HENRY (City and Hackney's Healthy Start contractor) and health visitors	Before the January 2027 census; Healthy Start November to March	Low: Lewisham's exercise cost about £800 (vendor case study)	Children's diets squeezed when food prices peak in 2027

From September 2026 every child in a Universal Credit household in England is eligible for free school meals, but parents still have to apply. Lambeth, Wandsworth, and Lewisham have enrolled about 1,500 pupils automatically from their own housing benefit and council tax support data, with an opt-out letter. London's universal primary free school meals continue in 2026/27, so the gain is mainly for secondary pupils and the school funding that follows registration. About 1,358 Hackney families were not claiming Healthy Start in 2023.

* Suggested formulation: check with a health worker before sharing.

Corrections: no source states the legal basis for automatic enrolment; councils have done it locally. The Healthy Start figure is a Hackney Foodbank estimate from October 2023, not current. A benefits check at the Redmond Centre's Monday community fridge was proposed, but no current source shows the fridge still runs; confirm with the Trust first.

11. Commission a holiday food route for Charedi children for summer 2027, and ask community bodies to pass on one cold-weather and vaccination message through their own channels this winter

PARTIALLY CONFIRMED | FOOD SUPPLY · FRONTLINE | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney Council (Crisis and Resilience Fund) or the GLA, with the Interlink Foundation; the Woodberry Down Muslim Community charity for its members	Messages from November; food route commissioned by February 2027	Precedent up to £450k (GLA, December 2023 to May 2024)	A price peak landing on the summer holidays, when Charedi families can least use mainstream holiday food schemes

In December 2023 the Mayor of London approved up to £450k (decision MD3171) for food insecurity support in Stamford Hill's Charedi community, as supermarket vouchers and direct payments for non-kosher-certified items, so families could spend their own money on kosher food. The Interlink Foundation (charity 1079311, 97 Stamford Hill) is the umbrella body for more than 200 Orthodox organisations. The Woodberry Down Muslim Community charity (1212536) is registered at the Redmond Community Centre and names elderly people among those it helps.

* Suggested formulation: check with a health worker before sharing.

Corrections: MD3171 did not buy kosher food; it funded vouchers and payments. The claim that council funding for 11 Orthodox Jewish organisations ended in September 2026 could not be confirmed; what did end was Hackney's school-holiday food vouchers.

12. Watch food prices on published series and agree in advance what each signal releases

PARTIALLY CONFIRMED | FOOD SUPPLY · ECONOMIST | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney Council public health and cost-of-living team	Thresholds by December; reviewed monthly to September 2027	Staff time; a monthly data-share with Hackney Foodbank	The 2027 money arriving after the peak

Proposed signals: ONS food inflation at 5% or more (monthly); the FAO All Rice Price Index up 10% or more in three months (monthly), or any Indian rice export restriction; and Hackney Foodbank volumes well above their 2025 average of about 680 people a week. Each signal releases the 2027/28 crisis-payment plan in action 3.

Corrections: Hackney Foodbank publishes no weekly figures; the 680 is an average of annual numbers, so agree a monthly data-share. The proposed 4% inflation threshold would fire around January 2027, given the 3.9% December forecast, so 5% is used.

13. Check that Berkeley and Insite are meeting the heat-network rules that came into force in January 2026, and get vulnerable residents onto the network's Priority Services Register

PARTIALLY CONFIRMED | ECONOMIST; CORRECTED BY VERIFICATION | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Community groups and Hackney Council check; Berkeley Homes complies; escalate to Ofgem	November	None to residents	Heat cut off, or self-disconnection, for older, disabled, or ill residents

Ofgem's heat-network authorisation conditions came into force on 27 January 2026. They require a Priority Services Register, support for customers in payment difficulty, no winter disconnection where an occupant is over 75, under 2, disabled, or chronically sick, a winter ban on switching those households to prepayment, and detection of self-disconnection with emergency or friendly-hours credit.

* Suggested formulation: check with a health worker before sharing.

Correction: the lens proposed lobbying for these protections, which are already law. What is not yet required is forbearance on standing charges, the one remaining ask.

14. Cash-first help, plus hot meals, for households in temporary accommodation that have no kitchen

UNVERIFIED | FOOD SUPPLY | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
Hackney housing and temporary-accommodation team	Agreed by March 2027	Not costed; not funded here	Food that cannot be cooked

About 3,450 Hackney households were in temporary accommodation in 2024; B&B rooms have no cooking facilities. National guidance on the fund steers toward cash, with in-kind help only where cash cannot work, which here means hot meals.

Unverified: no 2026 count was found, and neither the cost nor whether the Redmond kitchen could supply meals was checked. Temporary accommodation is the council's housing duty, so this is not a funding placement.

15. Clear the gullies on Seven Sisters Road and Green Lanes around the Manor House junction before the wet late autumn

PARTIALLY CONFIRMED · ALL-SEASON | EMERGENCY MGR · HISTORIAN | ADAPTATION INVENTORY: NONE FOUND

OWNER	BY WHEN	COST	PREVENTS
TfL (the A503 Seven Sisters Road is a red route); Hackney Highways on Green Lanes	30 November	Existing maintenance budgets	Ponding at the junction and the station subway entrances

The Met Office expects a wetter, stormier late autumn. The July 2021 flash floods hit nearby N8 and N15 in Haringey, and Haringey's flood investigation reports made gully clearance the priority.

* Suggested formulation: check with a health worker before sharing.

Corrections: no record of surface flooding at the Manor House junction itself was found, so this rests on a general rationale. Haringey may be responsible for the western kerb of Green Lanes. You cannot get flood warnings for surface water.

* Suggested formulation: check with a health worker before sharing.

WHO DOES WHAT

RACI CHART

R = Responsible (does the work) · **A** = Accountable (one per action; signs off and answers for it) · **C** = Consulted (asked before) · **I** = Informed (told after). Built from the owners named in the verified actions. No one here has been contacted or has agreed to a role; every row is a proposal.

Action	NHS NEL, GPs & pharmacies	Manor House Dev. Trust	Age UK East London	Woodberry Aid & WDCO	Faith & community bodies	CREW Energy	Hackney welfare & Here to Help	Hackney Housing	Berkeley & Notting Hill Genesis	Hackney Emergency Planning, Highways & TfL	Food banks & HENRY
1. RSV and flu at the door, 80+ first	**A/R**	**R**	**C**	**R**	**R**		**I**				
2. Referral partners; Pension Credit; casework		**R**	**R**	**R**			**A/R**				
3. Alert-triggered cash; 2027/28 plan		**C**	**C**				**A/R**				**C**
4. Cold-spell calls; visits after moves; registers	**I**	**R**	**C**	**A/R**	**R**		**C**	**C**	**C**		
5. Heating-outage plan per block				**C**				**R**	**A/R**	**C**	
6. Awaab's Law deadlines; private renters	**C**			**R**				**A/R**	**R**		
7. Warm Home Prescription	**R**		**C**			**A/R**	**C**				
8. Home-care staff flu vaccination	**R**						**A/R**				
9. Redmond as warm rest centre		**R**		**C**				**C**		**A/R**	
10. Free-school-meal enrolment; Healthy Start	**R**	**C**					**A/R**				**R**
11. Charedi holiday food; trusted messages	**C**				**R**		**A/R**				**C**
12. Food price watch and triggers							**A/R**				**R**
13. Heat-network compliance check		**R**		**R**		**C**	**C**		**A/R**		
14. No-kitchen households: cash and hot meals		**C**					**C**	**A/R**			**C**
15. Gully clearance at Manor House										**A/R**	

What the chart shows: **Hackney's welfare team is accountable for six rows**, and four of them (the referral list, the alert rule, the 2027/28 plan, and price triggers) need a decision, not money. **Berkeley and Notting Hill Genesis are accountable for the two rows that concern the buildings themselves**, which is where the skeptic and the historian place most of the risk. The Manor House Development Trust and Woodberry Aid do the work in seven rows and are accountable for one; they are the estate's delivery capacity, so the funding below goes to them.

* Suggested formulation: check with a health worker before sharing.

Verified and corrected. The council already holds £1m for crisis payments this year that must be spent by March. The best-value private pound gets frail residents found and referred into that money and into the NHS vaccine programme, rather than building a parallel cash scheme. First ask whether the Manor House Development Trust and Woodberry Aid are Here to Help referral partners (action 2); fixing that costs nothing.

FLOOR	TARGET	CEILING	LARGEST UNCERTAINTY
£15k	**£45k (£25k if no bill-credit route by 30 November)**	**£75k**	**How many residents over 75 are still unvaccinated against RSV; that decides whether the outreach placement is worth £12k or nothing**

Arithmetic. Floor: Manor House Development Trust outreach £12,000 (2 workers × 20 hours a week × 10 weeks × £18 an hour = £7,200, plus £4,800 translation, transport, and admin) + Woodberry Aid hot-meal contingency £3,000 = **£15,000**. Target: floor + Warm Home Prescription £20,000 (20 households × about £1,000, the evaluation's average) + Age UK East London casework £10,000 (13 weeks × a loaded £40,000 a year) = **£45,000**. If no organisation can pay bill credits on GP referral by 30 November, remove the £20,000: **£25,000**, a 44% fall. Ceiling: target + 30 more Warm Home Prescription households at £1,000 = **£75,000**. Above that, absorptive capacity binds: £75k is about 19% of the Trust's annual income, and outreach to fewer than 1,000 older residents runs out of new households. The hourly rate, the translation line, and the caseworker cost are planning assumptions, not published unit costs. No published cost per death averted exists for any placement in this setting, so the ranking rests on mechanism.

RECIPIENT	USE	AMOUNT	MECHANISM	BASIS	VERDICT
Manor House Development Trust (charity 1127604; operating as London Development Trust)	Action 1: door-to-door outreach to residents over 75, for RSV, Priority Services Registers, and Pension Credit	£12k	Direct rapid grant	Income £398,366 (year to March 2025); runs the Redmond Centre. Must be extra to any NHS vaccination-inequalities outreach money	Partially confirmed

* Suggested formulation: check with a health worker before sharing.

RECIPIENT	USE	AMOUNT	MECHANISM	BASIS	VERDICT
CREW Energy (community benefit society RS007286), or Fuel Bank Foundation	Action 7: Warm Home Prescription for 20 GP-referred households	£20k	Restricted grant, conditional	Sheffield Hallam evaluation, about £1,000 per household. CREW's £17,600 council grant (April to September 2026) pays for advice and equipment, not bills, so no double-funding	Partially confirmed; bill-credit route to confirm
Age UK East London (charity 1144535)	Action 2: Pension Credit and Attendance Allowance casework for over-75s found in action 1	£10k	Direct grant	Income £3.61m; formerly Age Concern Hackney; not in the council's crisis-fund grants	Confirmed
Woodberry Aid (company 12833349)	Action 4: hot meals for housebound residents	£3k	Contingency, released on a forecast 3-day spell at or below 2 °C	Handled a £12,320 council grant in six months; that grant ended in September. Not a registered charity. Ask first whether Hackney Giving's small-grants pot already covers it	Partially confirmed
Food hubs	Bulk food stock this autumn	£0	Dropped	The price peak is forecast for July 2027; stock bought now is eaten long before it	Contraindicated

The funder's one thing: the cash already exists. Hackney's £1m of crisis payments has to be spent by March or go back to DWP. The cheapest life saved here is the frail resident who gets referred into that fund and gets an RSV jab at the door, not a resident who gets a parallel grant.

* Suggested formulation: check with a health worker before sharing.

Do not do this

CONTRAINDICATED · ADVICE THAT WOULD COST LIVES HERE

Advice that circulates for this hazard and would cost lives, money, or trust here.

Do not answer damp and mould reports with "ventilate and heat more" leaflets in place of a repair *

CONTRAINDICATED SKEPTIC · HISTORIAN

The Housing Ombudsman's 2021 review of 410 damp and mould complaints found maladministration in 56% and told landlords to stop blaming residents' "lifestyle". The coroner in the Awaab Ishak case traced his death to mould from normal daily living, after the family was told to paint over it. Advice to heat more lands on households that cannot afford to. Ventilation advice is fine alongside a repair, never instead of one.

Instead: report in writing, start the Awaab's Law clock, and hold the landlord to it (action 6).

Do not accept painting over or wiping down mould as the fix, and do not rush solid-wall insulation in this winter

CONTRAINDICATED (NARROWED) SKEPTIC; SPLIT BY VERIFICATION

Awaab Ishak's father was told to paint over the mould. The National Audit Office (14 October 2025) found that about 98% of homes with external wall insulation under the ECO scheme, and 29% of internal installs, need work to correct major problems. Neither source is about blocks due for demolition; applying them to the old Woodberry Down blocks is this briefing's inference.

Instead: a real repair to deadline, moving vulnerable tenants first, and dehumidifiers while they wait (action 6).

Do not close a heating outage on the operator's or the council's word

CONTRAINDICATED (NARROWED) SKEPTIC

In Hoxton in winter 2024–25, tenants still had tepid or no heat after the council said service was restored; more than 450 households were affected across four outages. A restored plant room is not a warm flat.

* Suggested formulation: check with a health worker before sharing.

Instead: a door check of radiator and tap temperatures within 24 hours (action 5).

Do not wait for the Cold Weather Payment, or for an application, before money moves

`CONTRAINDICATED` `SKEPTIC · ECONOMIST`

The Cold Weather Payment pays £25 only for a 7-day period averaging 0 °C or below. None of the four strong El Niño winters in the Hampstead record produced one. A plan that waits for it will pay nothing in an El Niño winter, while short cold spells still come.

Instead: an alert-triggered payment to households already known to need it (action 3).

Do not count warm-space visitors as success, or treat warm spaces as a proven health measure

`CONTRAINDICATED (NARROWED)` `SKEPTIC`

The government's evidence review (November 2023) found "not a strong evidence base" and no study of health outcomes; footfall can include ordinary library users, and transport is a barrier for older people.

Instead: take help to the people on the lists (actions 1, 2, and 4) and measure who is reached against them.

Do not stockpile food this autumn as the El Niño response

`CONTRAINDICATED` `VERIFICATION`

Food inflation was 1.3% in August 2026 and is forecast to peak at 6.4% in July 2027, staying high into 2028. Stock bought in November is eaten by February, long before the peak, and ties up cash in storage and spoilage.

* Suggested formulation: check with a health worker before sharing.

Instead: plan the 2027/28 crisis-payment allocation and agree price triggers (actions 3 and 12).

Do not buy parametric "cold insurance" for households

CONTRAINDICATED ECONOMIST

No UK household parametric cold product exists. In the closest working examples elsewhere, payouts are a few dollars to about $20 a person, and a single weather gauge says little about whether a particular flat is cold.

Instead: the council's crisis payments, with an alert trigger (action 3).

Dropped as unsupported: a proposed warning against using council letters as the messenger, on the grounds that the regeneration has broken trust. No source showed that council letters fail here. What survives is a positive delivery note in action 1: the Stamford Hill flyer-and-community-group model worked.

WHAT HAS HAPPENED HERE BEFORE — THE RECORD

YEAR	EVENT	TOLL	WHAT CHANGED AFTER
1946–53	The London County Council builds Woodberry Down; first tenants move in in 1948	About 6,500 people in 1,796 homes by 1953	Some flats advertised as centrally heated
1952 (December)	The Great Smog, London-wide	About 4,000 deaths by the official count, 10,000–12,000 by modern estimates; no Hackney figure found	Clean Air Act 1956, which subsidised grate conversions rather than giving advice
1962–63	The Big Freeze	One of the worst winters for excess deaths since 1950; no Hackney figure found	—

* Suggested formulation: check with a health worker before sharing.

YEAR	EVENT	TOLL	WHAT CHANGED AFTER
1982–83, 1997–98, 2015–16	Strong El Niño winters	None found locally. Mild winters with little frost at Hampstead	—
2002	Structural survey of the estate	Most original homes judged beyond economic repair: damp, poor insulation, failing services	Regeneration launched with Berkeley Homes and Notting Hill Genesis
2009	Rebuild delayed two years; a £40m funding bid refused	—	Scheme recast over "the next twenty years"
2016 (11 December)	Burst main, Northwold Road, Stoke Newington	About 150 properties; 350 people evacuated	Stoke Newington Town Hall used as a rest centre
2019 (8 October)	Burst main floods part of N4	Not found	West Reservoir Centre staffed overnight
2020	COVID; Hackney Council cyberattack (October)	Benefit records lost; £12.2m of recovery spending in 2021–22 alone	Woodberry Aid and the Manor House Development Trust deliver hot meals and prescriptions
2021 (July)	London flash floods	Over 1,000 London properties; flooding clustered in N8 and N15, Haringey; no Hackney count found	Haringey flood investigations prioritise gully clearance
2022	Storm Eunice (18 February); Ombudsman severe maladministration finding against Hackney (May); poliovirus in sewage (June); Hornsey Road burst main (August)	A woman killed by a falling tree in Haringey; about 50 homes damaged in Hornsey Road	Polio boosters for under-10s

* Suggested formulation: check with a health worker before sharing.

YEAR	EVENT	TOLL	WHAT CHANGED AFTER
2023 (December)	Ombudsman special investigation into Hackney opens; GLA approves up to £450k food support for Stamford Hill's Charedi community	Maladministration in 79% of cases examined, 87% of damp and mould cases	—
2024–25 (winter)	Shoreditch heat network failures, Hoxton	More than 450 households with tepid or no heat	—
2025	Phases 5–8 approved (September); Awaab's Law in force (October)	692 social homes to be replaced by 583	Fixed repair deadlines for social landlords
2026	Ofgem regulates heat networks (January); double decant approved (July); FAO food price index highest since 2022 (September)	About 21 Phase 5 households face two moves	Excess cold joins Awaab's Law on 30 November

The recurrence nobody has noticed: the residents most exposed this winter live in buildings judged beyond repair in 2002. Each delay, in 2009 and then the 2025 re-phasing, has kept a shrinking group in those blocks for another winter. This is at least the third winter crisis (2010–11, 2022, now 2026–27) to find them still there. Plan for those blocks as housing that will see out this El Niño, not as buildings about to disappear. The second recurrence is national: a global harvest shock reaches London's shopping basket a year or two after the El Niño that caused it, as UK food inflation did in 1975 after the 1972–73 event.

WHERE THE EXPERTS DISAGREE — RESOLVED AND OPEN

- **Open: people or buildings?** The public health, economist, and philanthropist lenses put money and vaccines first. The skeptic and historian said the cold risk is decided by the building, not by residents, and that advice aimed at households changes neither a condemned block nor a shared plant room. Both are kept: actions 1 to 4 reach people, and actions 5, 6, and 13 hold landlords to duties that already exist.
- **Open: does the flu catch-up save lives?** Anderson 2020 found no measurable fall in deaths at the age-65 cutoff. The catch-up stays first because uptake has collapsed and the new RSV eligibility gives a strong reason to reach the over-80s, but its effect on deaths is stated as uncertain.

* Suggested formulation: check with a health worker before sharing.

- **Resolved: hold this year's money for 2027?** The economist and food lenses wanted part of this year's crisis fund kept for the July 2027 peak. Verification found each year's money must be spent within that year; the 2027/28 allocation, with a larger crisis line, is what meets the peak.
- **Open: can Hackney pay without an application?** DWP's guidance is cash-first but has no explicit wording on proactive payments. Action 3 depends on Hackney reading its own "may use data" line that way.
- **Resolved: lobby for heat-network protections?** The economist proposed it; verification found Ofgem's rules already require them. Action 13 is a compliance check.
- **Open: what a Warm Home Prescription costs.** The evaluated trial averaged about £1,000 a household; the latest phase paid up to £245. The envelope uses £1,000 and says so.
- **Resolved: council letters as the messenger.** The frontline lens judged that the regeneration had broken trust in the council. No source supported a contraindication; it survives as a delivery note.

WHAT NOBODY COVERED

BLIND SPOT

Private renters, and the other side of the junction. 34.8% of the ward's households rent privately. They are outside Awaab's Law until at least 2027, outside the landlords' vulnerability lists, and often move between winters, so no list in this briefing reliably finds them. Manor House also sits on a borough boundary: the Haringey and Islington sides have different councils, crisis funds, and (for Haringey) a different NHS board, North Central London, and nobody owns the junction as one place. No local count of winter deaths, malnutrition, or food insecurity exists to show whether any of these actions worked.

HOW TO READ THIS

METHOD

The panel is author-built. Eight simulated expert lenses were used to generate these recommendations. Where they agree, that is a strong hypothesis, not a consensus of the field. Every recommendation was then independently checked for evidence, transferability to this location, and feasibility before the peak; the verdict tags carry the result.

Mortality figures are resolved at Climate Impact Lab impact-region scale, roughly 300,000 people. They are not neighbourhood figures. The El Niño projection covers *heat only*; cold, flu, food prices, and flooding are additional to it and are carried here by the station record, the historical record, and the supply-chain evidence rather than by a published number.

* Suggested formulation: check with a health worker before sharing.

- **Scope.** The request was for a full postcode in N4, which covers a few homes. It geocodes to Woodberry Down ward, London Borough of Hackney (lower super output area Hackney 002A), so the briefing was built for Woodberry Down ward and the Manor House area, with the wider N4 district as context. Climate Impact Lab impact region: the region containing the London Borough of Hackney, name not resolved. Population figures are ward-level (Census 2021); health figures are borough-level, and flu uptake includes the City of London. Sub-city detail is used for hazard exposure and action design, not for death counts.
- **Exposure.** Climate Impact Lab, *451,000 at Risk* (September 2026, pre-peer-review): ECMWF SEAS5 seasonal forecasts (51-member ensemble) applied to temperature–mortality relationships across 24,378 regions, against a 1996–2025 baseline, for June 2026 – February 2027. It covers heat only. It is never added to the Impact Map's long-run projections or quoted from the map's GDP-denominated mortality. Where heat is not the dominant hazard, the historical record carries the hazard instead of a borrowed number.
- **Premise test.** Carried from the E17 Walthamstow briefing (11 October 2026): NOAA station data for Hampstead (UKE00105915), about 4 km from the ward, and Heathrow (UKM00003772), classed by the CPC Oceanic Niño Index.
- **Expert panel.** Eight simulated expert lenses (emergency manager, public health scientist, frontline responder, skeptic, economist, historian, philanthropist, and food supply chain analyst) each researched this place independently and in parallel, from web sources, to a fixed brief. Each was given the national facts verified for the E17 briefing the day before and asked to research only what is local, and to flag contradictions.
- **Reconciliation.** Duplicate actions were merged and backing lenses recorded. Convergence was tested for shared bias before it counted in an action's favour; in particular, the care-home vaccination evidence was demoted when verification found no care home for older people in the ward. Contradictions were kept. Actions were ranked by expected lives saved per unit of effort before the peak, each was given a payer and trigger or marked unfunded, and the funding placements were reconciled against the ranked list.
- **Verification.** Six verifier agents checked the health actions, the financial actions, the housing and operational actions, the food actions, the funding envelope, and the contraindicated items and community facts, on evidence, transferability, and feasibility. They fetched Fingertips, Nomis, the Lancet Infectious Diseases RSV study, Cochrane, Hackney's Crisis and Resilience Fund Cabinet report (23 March 2026), Ofgem's heat-network decision, Housing Ombudsman decisions, GOV.UK guidance, and charity and company records directly. Financial actions were checked for availability, payer, trigger, and redundancy. The envelope was re-summed.
- **Verdicts.** *Confirmed*: evidence, transferability, and feasibility all hold. *Partially confirmed*: holds after the corrections shown. *Unverified*: could not be checked to a primary source. *Contraindicated*: would do harm or waste the window here.

* Suggested formulation: check with a health worker before sharing.

- **Adaptation Inventory.** Not re-read for this briefing. When it was read in full for the E17 briefing (all 96 entries), none was from the UK; the cold-relevant entries were Toronto's cold-weather alerts (no effect) and US winter-weather advisories, and there was nothing on vaccination, fuel credit, welfare checks, food access, or heating outages. Those findings are carried into the tags.
- **Health wording.** Passages where a wording error could hurt someone (vaccine eligibility, heating outages, and damp and mould) are marked "* Suggested formulation: check with a health worker before sharing." They were checked against published sources, not by a health professional. They are suggestions, not medical advice, and anyone passing them on should confirm them with a doctor, pharmacist, nurse, or community health worker first. The marker was added on 2 November 2026.
- **Rules.** No cost is derived by dividing a published total, and no local figure is invented; where data is thin, the report says so. Every source is listed below with its verification status.
- **Limits.** The panel and verifiers are AI research agents working from web-available sources, not human experts, and no one in Woodberry Down was interviewed. Not reachable: Hackney's moderngov pages and parts of its news site (403), the Charity Commission register (403; charity records were read through findthatcharity.uk), and a Morning Star report on mould in the old blocks (403, undated, not used). Not confirmed: the Here to Help referral-partner list, who runs housebound vaccination in City and Hackney this year, whether the Redmond community fridge and Woodberry Down Foodhub still run, whether the Mayor's Pension Credit campaign covers Hackney, and a 2026 temporary-accommodation count. The 2002 block count and the "128 aged 80+" estimate were dropped as unverifiable.
